Direct use/Purpose Statement (50 words):

This lesson provides high school newcomers with meaningful interactions with text, peers, their teacher, and the grade-level curriculum. They read a short, high-interest informational text which is a springboard to discussion with peers. Other activities include vocabulary acquisition, writing summary sentences, and creating Frayer Models for deeper understanding of key words used across content areas. All activities are designed to build content and language skills with scaffolding and modeling for support.
